I'm Anton Wilhelm

I'm a JavaScript fullstack developer and coach. I create applications to automate and simplify workflows. I like teaching music and coding. Let's start scrolling and learn more about me.

About Me

I was born in Uzbekistan and grew up in a town in East Frisia. When I was 13 years old, I started to experiment with HTML, JavaScript and PHP for private websites. After high school, I moved to Kassel where I studied computer science. In Kassel I dove deeper into programming languages like Java and Ruby. When I finished with my study I moved to Berlin. Currently I'm living close to Berlin, in Bad Saarow and working at Actano, Berlin.

Misc

Coaching

My parents are music teacher and in school I was in a special music class. When I was older I helped out as substitute teacher at the music school of my parents. I have really enjoyed teaching people, especially music theory. In Berlin I started to contribute at some events as coach: OpenTechSchool, Rails Girls and NodeSchool

Talks

I did some talks, for instance at Berlin Hack and Tell, BerlinJS and Fullstack.js. You can find them on Speaker Deck.

Open Source

I love the concept of Open Source. In 2012 was my first contribution for Symfony2 and Doctrine. In 2013 I become the core maintainer for js2coffee until the origin author did a rewrite from scratch. In 2014 I've started maintining compnoent, a package manager and build tool for the frontend.
